Course Description: This course approaches knowledge and understanding of criminal behavior and the impact of crime on individuals and society from developmental, cognitive-behavioral, and other psychological perspectives. The basic premise of the course is that multiple variables influence people's behavior and requires attention to how these factors interact with situational variables. During the course, topics such as criminological theories, biological and psychological models of criminal behavior, crime and mental disorders, juvenile delinquency, aggression and violence, communication				

with criminals and judicial processes will be examined.

This course is a certified program offered in collaboration with the University's Center for Continuous Education. To be eligible for certification, students are required to attend at least 80% of the classes throughout the spring term and achieve a minimum average grade of BB (80 out of 100). Upon successful completion of these requirements, participants will receive an official certificate from the Center for Continuous Education, recognizing their dedication and academic achievement.
