Course Objectives				
Course Learning Outcomes	This course aims to systematically improve students' listening and note-taking skills. Students will gain the ability to identify ideas, capture connections, use symbols and abbreviations, create memory prompts, and reconstruct ideas both in writing and orally through note-taking techniques. Thus, by effectively using short-term and long-term memory, they will establish a sustainable practice of listening and note-taking that will benefit both their academic and professional lives.		Relations	
			Program Outcomes	Net Contribution
	1	Defines the basic techniques used in listening and note-taking and distinguishes between them.	3, 6, 7, 9	4, 5, 5, 4

	3	Applies techniques such as mind maps, verticality, links, and pro-forms in different texts.	5, 8	5, 5
	4	Improves note-taking speed by using symbols and abbreviations and develops a personal system.	7	5
	5	Produces an outline/summary from notes and conveys the ideas into the target language.	6	5
	6	Analyzes missing parts during listening and develops prompts to support memory.	7, 11	5, 4
7	Evaluates his/her own note-taking performance and comments on strengths and weaknesses.	4, 9	5, 5	
Course Content:	This course integrates the theoretical foundations of listening and note-taking skills with practice. Students learn and apply techniques such as identifying ideas, detecting connections, mind maps, verticality, links, pro-forms, symbols, and abbreviations. Before the midterm, students reinforce the techniques through note-taking exercises on transcripts; after the midterm, they adapt to real listening environments by working with audio recordings. Throughout the semester, students develop the ability to produce outlines/summaries from their notes, use memory prompts, and manage missing information. In this way, they gain the competence to use note-taking not only for interpreting but also as an effective tool for communication and learning in their academic and professional lives.
