Sustainability and Digital Literacy

- In today's interconnected and rapidly evolving world, sustainability and digital literacy are essential competencies for driving meaningful change across industries and societies. This module provides a multidisciplinary approach to sustainable development, equipping participants with the skills to integrate environmental, social, and economic sustainability principles into business, technology, and policy-making.
- Students will explore key topics such as environmental social governance (ESG), circular economy strategies, carbon accounting, sustainable innovation, and ethical leadership. Through the use of digital tools and platforms, they will develop critical thinking, adaptability, and problem-solving skills while fostering collaboration in diverse international and virtual settings. The course also emphasizes cultural awareness, global citizenship, and teamwork to address complex global challenges effectively.
- The module consists of online theoretical instruction combined with hands-on experiences, including expert-led excursions and field visits. The on-site component will take place at Çağ University in Turkey, allowing students to engage directly with sustainability professionals and industry leaders.
- Upon successful completion of the course, participants will earn two digital badges: Digital Literacy and Sustainability, recognizing their ability to leverage digital tools for collaboration and problem-solving, as well as their commitment to sustainable development.
- This module is designed for different levels of studies including Bachelor's, Master's and Phd students from diverse academic backgrounds, who seek to become leaders in sustainable innovation and digital transformation.

Study Course

Blended Intensive Program (BIP) on Sustainability and Digital Literacy

Bachelor/Master/PhD. Students

11 online lectures, each lecture 135 min., **22.05.2024 - 26.06.2025**

- Intensive week in Çağ University, Turkey, **12.05.2025 - 16.05.2025**
- Language English
- 4 ECTS
- Evaluation – homework, final presentation
- Minimum of 10/maximum of 20 international participants
